

# CROOKED CREEK

Milton, Georgia

Crooked Creek is a 640 home community in Milton, Georgia. This active community prides itself on providing a variety of park and recreation amenities for its residents. In 2008, Crooked Creek Homeowners' Association contracted Tunnell-Spangler-Walsh & Associates to provide a schematic plan and construction documents for updating and enlarging the community's main amenity area located at the entry to the Crooked Creek community. The new amenities to be included on the 4.5 acres are a new clubhouse to replace the existing clubhouse, a new family pool, a new lap pool, a new pool bathhouse, an addition of two tennis courts to the existing eight tennis courts, a new 2-story tennis pavilion, a new basketball court, an enlarged playground area, a new event field, and additional parking.

TSW planners and architects worked together to ensure these gateway amenities function well for the required sport and recreation activities and allowed for a blending of the architecture into the existing residential community. Heavy timber wood columns, stone, board and batten siding, and brick are used to create landmark Tudor and rustic buildings that add to the overall perception of the Crooked Creek Community.
