

LOWER PROVIDENCE COMMUNITY CENTER

Philadelphia, Pennsylvania

TUNNELL-SPANGLER-WALSH & ASSOCIATES

The Lower Providence Community Center, at the request of the City, was designed to blend in with the colonial architecture of surrounding neighborhoods. Totalling 60,000 sq. ft., the public facility combines golf operations, indoor ice skating, banquet and meeting rooms, two restaurants, and locker areas for an 18,000 sq. ft. outdoor pool. TSW provided architectural services for the community center through construction documents.
