

# VILLAGE AT BAYTOWNE WHARF

Sandestin, Florida

TSW was retained by Intrawest to provide landscape architectural services, including design development input, construction drawings and construction observation, for Sandestin's \$78 million Village at Baytowne Wharf. Working with a team of architects, engineers and landscape architects, TSW completed the first design package, The Baytowne Gateway Building.

The focal point of the building is a 70,000 square foot rooftop garden which features multiple outdoor dining terraces, a dolphin fountain, garden path, formal garden and swimming pool with two spas. TSW also provided master planning for the entire Sandestin community.
