

WATERSOUND PARKS AND OPEN SPACES

Walton County, Florida

WaterSound, developed by St. Joe along the Florida Gulf Coast, includes a series of neighborhoods totaling 1,400 homes with unique parks and open spaces and community facilities. After completing the master plan for WaterSound, TSW was retained to provide landscape architectural services for a large portion of Phase I development, including schematic designs for the main WaterSound entrance, Lake Powell trails and park spaces, Village Commons, and Winter Garden.
