

WOODSTOCK COMMUNITY PARKS

Woodstock, Georgia

The Woodstock Downtown development, a mixed-use community in the heart of Woodstock, Georgia, contains several community parks and open spaces. TSW, as part of the master planning effort, created conceptual and schematic plans for each of the parks.

Dial Park, a mostly wooded linear park centrally located in the development, is the focal point of the park system and contains a basketball half-court, passive lawns areas, water features, playground, fire pit, and two pavilions. Other parks in the community include a swim club, picnic areas, and pocket parks.
