

LYTLE FARM PARK

Dauphin County, Pennsylvania

TSW was hired in 2009 to design a 44-acre park in Dauphin County, Pennsylvania, as part of the new Lytle Farm community. Harrisburg Pike bisects the future parkland, creating distinct portions of the park. The north portion envisioned as more of an active park, which includes tennis courts, basketball courts, volleyball courts, soccer fields, and canoe launch, ponds and meadow, while the south portion is more of a passive park that has a recreation center, amphitheater, fishing pier, canoe launch, dog park, playground, and a large open meadow and pond.
