

BANKHEAD MARTA STATION TRANSIT AREA LCI

Atlanta, Georgia

TUNNELL-SPANGLER-WALSH & ASSOCIATES

TSW was part of a team that prepared the Bankhead MARTA Station Transit Area LCI Study for the City of Atlanta. The City sought to develop a long-term vision for promoting growth around the Bankhead MARTA Station and in adjacent neighborhoods by promoting visual appeal, establishing a compatible mix of land uses, preserving local identity, ensuring multiple transportation options, improving public safety, and supporting economic development. This Study assisted the community in defining their vision and creating a master plan that utilizes transportation improvements, land use policies, and sound urban design to improve the quality of life within the station area and nearby neighborhoods. By recognizing existing challenges and building upon opportunities, the Study is intended to serve as a guide for positive change that both benefits the immediate area and the Atlanta region.
