

1200 BLUEGRASS LABORATORY RENOVATION

Alpharetta, Georgia

TSW Architecture was retained by Arch Chemicals, Inc. to provide design, construction documents, permitting, and construction administration services for the renovation of an existing laboratory facility in Alpharetta, Georgia. The two-phase renovation of an existing one-story building was to relocate and consolidate their Research & Development Department into this updated and renovated Laboratory facility.

Phase I of the project included renovation of seven existing research and development laboratories and one wet laboratory environment.
