

WEST BARTRAM TOWNHOMES

Atlanta, Georgia

TUNNELL-SPANGLER-WALSH & ASSOCIATES

The Tunnell-Spangler-Walsh & Associates Architectural Studio has designed the West Bartram Townhomes Block, a unique residential product of two story townhomes over a flat residence. Garage parking is provided underneath and is accessed via an alley. The block is broken into a variety of building facades that reflect architecture in Atlanta's older community centers. Buildings utilize sidewalk entrances and pedestrian scaled detailing to engage the street, while balconies and stairs create visual interest. Construction on the block is underway. Facade design is in collaboration with Historical Concepts.
