

WEST CROGAN
Lawrenceville, Georgia

Located along West Crogan Street in downtown Lawrenceville, the West Crogan mixed-use development is just another example of the continued revitalization efforts to make Lawrenceville a vibrant, mixed-use community center. Following the recommendations of the Downtown Master Plan, which was completed by TSW, the West Crogan project combines street-level retail with residential units above and townhouse units to provide a variety of residential options. The project complements nearby downtown buildings with brick facades, wood detailing, and large storefront windows.
