

ROYAL WESTMORELAND

St. James, Barbados

Proposed Golf Community Clubhouse 31,000 sq. ft.

Petrea Heights Townhomes

Living Space Floor Plan

During 2007 and 2008, TSW provided the Royal Westmoreland Golf Club Community Barbados architectural design services for a number of their phase two amenities and residential products. TSW's work included the design of a new 31,000 sq. ft. "Bajan" style 2-level golf clubhouse. The new facility includes extensive food and beverage areas, and greatly expanded locker areas for members. TSW Architecture also completed full construction documents for a new generation of townhomes. These units feature elevated living/dining areas, and roof gardens. Construction is schedule to start Spring 2009.
