

# LISI LAKE MASTER PLAN

Tbilisi, Republic of Georgia

TSW was invited to a charrette to design Phase I of the Lake Lisi Master Plan in December 2010. Lake Lisi is located at the edge of Tbilisi, which is the capital city of the Republic of Georgia. The plan was created to take advantage of the steep topography and large canyons. The sustainable approach to site design created large swaths of open space and minimized grading. The plan took advantage of the great views into the city, while paying tribute to the great streets of old town Tbilisi.
