

VICKERY
Cumming, Georgia

The Vickery Plan was originated by the well-known firm of Duaney Plater-Zyberk & Co. After conducting a one-week charrette, Hedgewood Properties hired TSW for the purpose of carrying the plan forward from concept to implementation.

Covering 210-acres, the Vickery project is made up of a town center, with a Y.M.C.A. and community green as focal points, retail and office spaces. Residential products include live/work units, townhomes, and single-family homes.

TSW has worked on all aspects of the project, from master planning through to details, such as street patterns and street widths.
