PONCE PARK SOUTH STREETSCAPES

Atlanta, Georgia

TUNNELL-SPANGLER-WALSH & ASSOCIATES

TSW worked with a private development team on the implementation of Ponce Park South, a mixed-use urban infill project along North Avenue within the City of Atlanta. In accordance with fundamental urban design principles, the buildings address the existing and proposed streets creating pedestrian and market friendly sidewalks. A majority of the proposed streetscapes are within the public right-of-way and designed in accordance with the MRC-3 zoning regulations.
