

# VICKERY TOWN CENTER STREETSCAPES

Cumming, Georgia

The Vickery Plan was originated by the well-known firm of Duany Plater-Zyberk & Co. After conducting a one-week charrette, Hedgewood Properties hired TSW for the purpose of carrying the plan forward from concept to implementation. Covering 210-acres, the Vickery project is made up of a town center, with a YMCA and community green as focal points, retail and office spaces. Residential products include live/work units, townhomes, and single-family homes.

TSW has worked on all aspects of the project, from master planning to schematic and construction documents for the town center. Final construction documents included grading, hardscape, and planting plans for the streetscapes and public opens spaces in the town center.
